PROJECTS

Rubik's Cube Solver Website
A website that allows users to play with a digital Rubik's Cube. It includes a random shuffle function, automatic and manual solving methods, and a log that tracks which turns are made on the cube. Uses HTML, CSS, and Javascript.

Collection Tracker Website
A website that allows users to digitally keep a log of any collections they may have. It can handle multiple user accounts, stored locally. Uses HTML, CSS, Javascript, and React.

Typing Game Website
A website that allows a user to play a typing game with multiple difficulties, keeping track of their high scores. It is able to handle multiple, password protected, user accounts with unique usernames, stored locally. Uses HTML, CSS, Javascript, React, and Redux.

Personal Website
A website that introduces myself to any interested parties. It includes descriptions of myself, links to my relevant professional pages, my resume, and a list of my projects with links to visit them. Uses. HTML, CSS, Javascript, and React
